+Stacy, Eli

Hey Rob, we have very specific language on the App Developer investigations that we will need to provide if any further info is to be distributed on this. Can we connect so I can understand what information you're trying to share and to who? [or please share in email]. We can only share this information with folks on a need to know given the legal privilege for this exercise.

Also we don't do revenue impact analysis, but you're more than welcome to do so for any GMS partners you see on the list. Lmk if any further questions.

Thanks,
Nana

Ah yes thank you.

I'm happy to write something up similar to what I did for app review and share around to the other regions if that's helpful?

Is Ann Cantrell involved in this at all?

Rob

Thanks Victoria,

I can see the lists below and no names jump out at me but can I still see the full list? Do we have any kind of revenue impact analysis (not that it matters but because I'll get asked).

Hi Nana,

Looping in Rob Penwell who will be able to help with the GMS outreach. Can you please send him the list as well?

Thanks,

Victoria

Subject: A/C PRIV - App Developer Investigations Lack of RFI Response Suspensions [May 29, 2019]

Attorney client privilege, please do not forward without legal guidance

Hi Everyone,

As part of our ongoing App Developer Investigations, we have a list of **50,863 apps** [associated with ~80 developers] targeted for suspension next week due to lack of response to our RFIs [Request for Information].

There are 2 [quiz app] developers with over 90% of the apps from the list, AppBank ~42K and Crowdstar ~5K, of which we have not been successful in reaching as only email bounce backs. We've also previously noted both developers in our weekly RFI internal reports that go out [Crowdstar on March 31 and AppBank on April 5] but never received information on this and not clear if anyone owns these relationships.

We are sending this email as 1 week heads up to our business leads for the targeted suspension date of May 29th. Appreciate if you/someone in your team can review the attached list and let us know if there are any additional contacts you'd recommend for your partners. In this case, we will reach out proactively to work with them and remove the app/developer from the targeted list of suspensions this month, providing a new timeline for their responses. However, in the event we receive no response from them, we will enforce as planned.

Suspension plan

- Target enforcement date: May 29th, 2019 by 12pm PT
- **Action Needed:**

- o Please review the targeted suspension list and let us know if there is an additional contact you'd like us to reach out to for your partner. **The excel list attached has more details and contacts we reached out to per app.**
- o Please review comms guidance and reinstatement process in [this post](#) under the A/C Priv RFI Group [please add anyone in your team who should be alerted]. If you're not impacted by any of apps/developers below, no action needed.

The tables below provides a high level snapshot of the developers and volume of associated apps, including active user counts.

Developer	Number of Apps	Sum of Active Users	Sum of API Users 28 Days
